

What Do I Need to Know About Changes to the 2015-16 UIP Timeline?

NEW 15-16 UIP Resources Available

This year we will provide one-pagers, FAQs, and offer several optional webinars on UIP topics including:

- How do I get started on my 15-16 UIP without CMAS data?
- How do I interpret performance of CMAS status data? How do I modify my UIP based on my performance on CMAS?
- How do I address feedback received from CDE?
- How do I know which addenda I need to complete?

Check out the [UIP Timeline](#) on the [ARE UIP website](#) to see dates for when these resources will be available!

Three UIP Upload Dates

October 28, 2015 - Upload your current UIP. “Current” means to update your UIP as needed based on review of district and school assessments, PSR data, etc. This may or may not result in modifications to your Major Improvement Strategies.

January 6, 2016 - Reload your modified UIP after you have received CMAS status data. In previous years, the winter upload took place in December. However, in order to give schools as much time as possible to review and interpret CMAS status data arriving in late November/ early December we have moved the deadline to January.

April 6, 2016 - Reload your final 15-16 UIP, incorporating feedback* from the Colorado Department of Education (CDE). This submission will be posted publicly on the state’s website, [Schoolview.org](#) in May 2016.

** Feedback from CDE is only given to schools identified as **Turnaround** or **Priority Improvement** using the state’s 2014 SPF rating. Feedback from CDE to the school will be based on the school’s January 6th submission. Click [here](#) to access your state 2014 SPF rating.*

UIP Graphs

UIP graphs will be created and available for schools to use in development of their 2015-16 UIP the week of September 21. Look under [UIP resources](#) for updates.
